

Save the curlew

Tell us about your sighting

**Extinct
in Wales
by 2030**
at the current
rate

Wales has lost over 80% of its breeding Curlew population, less than 450 breeding pairs remain.

We urgently require records of where Curlews return to breed each Spring. If you see or hear them, or if you have breeding pairs on your land, please let us know so that we can work with farmers and landowners to try and reverse the decline.
